Language Learning App – Final UX Workflow

1. Splash Screen

- Purpose: Display the app brand and quickly load the application.
- Elements: App logo, short tagline such as 'Practice languages with real people', soft gradient background.
- Flow: Automatically navigates to the onboarding screens.

2. Onboarding (Value Explanation)

- Show3 – 4 screens explaining the value of the app.
- Example messages:
- • Learn languages with real people.
- • Guided 10 minute conversations.
- • Balanced sessions – 5 minutes for each language.
- • Improve speaking confidence.

3. Language Selection

- User selects their native language.
- The user selects the language they want to learn.
- Examples: English, Spanish, French, Arabic, Dutch.

4. Practice Preference

- Question: 'How do you prefer to practice?'
- Options: Audio, Video, Both.
- Note: This is only a preference and does not restrict matching.

5. Soft Paywall (After Onboarding)

- Show a soft paywall after on boarding while still allowing users to continue with the free version.
- Benefits shown on the screen may include:
- • Unlimited sessions
- • Priority matching
- • AI corrections
- • Learning insights
- Buttons: 'Start Free Trial' and 'Continue Free'.

6. Sign In / Account Creation

- User signs in only after understanding the value of the app.
- Options: Sign in with Google, Sign in with Apple, Continue with Email.
- The system then creates the user account and attaches onboarding data to the profile.

7. Home Screen

- Main goal: Encourage users to start practicing immediately.
- Elements: Greeting message, 'Ready to Practice' button, progress summary, recent sessions.

8. Matching System

- When the user taps 'Ready to Practice', the system searches for a partner.
- If a partner is found quickly, the session starts immediately.
- If no partner is available, the app can show options such as:
- • Notify me when someone is available
- • Record a short audio response
- • Schedule a session
- • View online learners

9. Ready-to-Practice Users List

- Show available users with their native language and learning language.
- Example: Khushi – Native Spanish, learning English. Users can start a
- session directly from this list.

10. Partner Found Screen

- Show confirmation that a partner has been found.
- Display partner name, native language, and learning language.
- Short countdown before the session begins.

11. Guided Conversation Session (Core Feature)

- Total session duration: 10 minutes.
- Round 1: 5 minutes in Language A.
- Round 2: 5 minutes in Language B.
- Display a visible countdown timer.
- Show prompts to guide the conversation.
- Controls may include: Mute, Enable Video, End Session, Report.

12. Session Completion

- After the timer ends, show 'Session Complete'.

- Both users can choose to continue the conversation or end the session.

13. Mutual Validation

- Users confirm whether the session happened successfully.
- If both confirm, messaging becomes available.

14. Feedback and Corrections

- Users can rate the session and send language corrections.
- Example: 'You sayed' corrected to 'You said'.

15. Chat Screen

- Text messaging between users after the session.
- Users can share corrections and continue practicing.

16. Learning History

- Show user statistics such as:
- • Total sessions completed
- • Languages practiced
- • Total speaking time.

17. Profile Screen

- Displays user information, languages, practice preferences, session history, and subscription status.

18. Hard Paywall

- Displayed when the user attempts to access premium features.
- Examples: Unlimited sessions, priority matching, advanced corrections.

Complete App Flow

- Splash → Onboarding → Language Selection → Practice Preference → Soft Paywall → Sign In → Home → Matching → Partner Found → Guided Session → Session Complete → Feedback → Chat → Learning History
